

Carlube - The Heartbeat of your engine.

Technical Data Sheet

Advanced Durable Engine Oil

Carlube 2-Stroke Fully Synthetic is a high performance ashless engine oil, providing advanced durability for a wide range of 2T applications, also suitable for use in direct fuel injection (DFI) and non DFI engines.

Why Carlube 2-Stroke Fully Synthetic is an Advanced Durable Engine Oil

Carlube 2-Stroke Fully Synthetic has been developed to meet a wide range of 2-stroke applications to maximise rationalisation, including:

- Outboards
- All-terrain Vehicles (ATV)
- Personal Water Crafts (PWC)
- Snow Mobiles
- Motorcycles

Carlube 2-Stroke Fully Synthetic is a specially formulated ashless engine oil developed to prevent high temperature deposit formation with excellent anti wear performance. The build-up of deposits can cause a host of challenges within a 2-stroke engine. Piston ring sticking, power valve sticking and formation of deposits on the exhaust port can disrupt the flow of the exhaust system resulting in power loss and potential engine failure.

Carlube 2-Stroke Fully Synthetic eliminates piston ring and power valve sticking providing a cleaner engine, which will allow for long lasting power and service life, providing the best performance for your engine.

Carlube 2-Stroke Fully Synthetic has been developed using a premium additive package offering enhanced cleanliness and wear protection, beyond the levels provided by older or poorly formulated oils. Using a poorly formulated or incorrect oil can lead to soot formation, sludge and deposits resulting in excessive engine wear, which can eventually cause damage to the engine.

Carlube 2-Stroke Fully Synthetic has been tested in a wide range of conditions to meet the requirements of a number of applications. Heat, water, dust, mud, ice and snow can affect the operation of the engine and Carlube 2-Stroke Fully Synthetic provides constant lubrication protecting all engine components against wear and maintains engine cleanliness.

Customers using Carlube 2-Stroke Fully Synthetic will benefit from proven engine durability and cleanliness allowing for long lasting power.

Suitable for use in a wide range of 2T applications

Carlube 2-Stroke Fully Synthetic can be used in direct fuel injection (DFI), non DFI engines and in a wide range of end use application types:

- Outboards
- All-terrain Vehicles (ATV)
- Personal Water Crafts (PWC)
- Snow Mobiles
- Motorcycles

Specification

API TC
JASO FC
ISO-L0EGI

Product Reference

Size	Part No	Barcode
1 Litre	XFS201	5010373019627

Properties

Kinematic Viscosity (mm ² /s)	@40°C	35.14
	@100°C	6.86
Viscosity Index (VI)		158
Pour Point (°C)		-45
Flash Point (°C)		99
Sulphated Ash (%)		0

Environmental Protection & Safety Precautions

Do not pour used surplus oil down sewers or drains. Dispose of used or surplus oil at your nearest oil-recycling bank. Dispose of empty packs in a responsible manner. Store container in an upright position and secure when transported. Wear goggles if splashing risk. Avoid exposure to oil mist. When using oil do not eat, drink or smoke. Wash hands after use.
